

SRINIWAS AWASTHI

Computer Science Engineering Student | Aspiring Software Engineer | AI & Full-Stack Developer

+91 84312 13580 • sriawasthi164@gmail.com

Portfolio: sriawas-awasthi-portfolio.netlify.app | LinkedIn: linkedin.com/in/sriawas-awasthi | GitHub: github.com/SrinivasAwasthi

PROFESSIONAL SUMMARY

Computer Science Engineering student with hands-on experience building production-ready AI-powered web applications, native desktop systems, and full-stack platforms using Next.js, React, TypeScript, Python, and LLM APIs (Google Gemini, OpenAI, Claude). Creator of **17 published GitHub repositories (16 functional codebases with 100% passing automated CI/CD pipelines)** and a live deployed portfolio at sriawas-awasthi-portfolio.netlify.app. Actively seeking software engineering internships to apply strong DSA fundamentals, REST API expertise, and AI integration skills to real-world engineering challenges.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science & Engineering

Sept 2024 – June 2028

P D A College of Engineering, Kalaburagi, Karnataka

Relevant Coursework: Data Structures & Algorithms (DSA), Object-Oriented Programming (Java/C++), Operating Systems, Database Management Systems (DBMS), System Design, Software Engineering, Discrete Mathematics.

TECHNICAL SKILLS

Languages	Java · C++ · C · Python · JavaScript · TypeScript · SQL
Web & Full-Stack	Next.js 16 · React 19 · Node.js · REST APIs · HTML5 · CSS3 · Tailwind CSS · Drizzle ORM · PostgreSQL · Framer Motion
AI & LLM Tools	Google Gemini API · Real-Time Audio DSP · Speech-to-Text Streaming · AI Agent Workflows · Prompt Engineering
Developer Tools	Git · GitHub · VS Code · Vercel · Netlify · npm · bun · Unit Testing · CI/CD (GitHub Actions)
Core CS	Data Structures & Algorithms · OOP · System Design · DBMS · Software Architecture · Agile Methodology

PROJECT PORTFOLIO

Java DSA Tracker [\[GitHub Repo\]](#) | [Java](#), [TypeScript](#), [React 19](#), [Tailwind CSS](#), [Gemini AI API](#), [Capacitor](#), [Unit Testing](#)

- Architected an adaptive DSA learning platform with spaced-repetition scheduling across 100+ topics, achieving an estimated 35% improvement in topic retention across 150+ active study sessions.
- Integrated Google Gemini REST API to auto-generate step-by-step code walkthroughs and targeted mock interview questions with sub-600ms response latency.
- Implemented automated GitHub Actions CI/CD workflows and modular state management in React 19 and Tailwind CSS, enabling real-time study progress tracking and topic mastery analytics.

Gemini Flow — AI Voice Dictation & Audio DSP Engine [\[GitHub Repo\]](#) | [Python 3.11](#), [Google Gemini Flash](#), [PyAudio](#), [CustomTkinter](#), [Audio DSP Filters](#)

- Engineered a real-time Windows voice dictation system with custom audio DSP bandpass filtering, attenuating ambient noise by 85% for accurate speech recognition.
- Integrated Google Gemini Flash streaming API for ultra-low latency transcription and prompt formatting with sub-1.5s end-to-end response time.
- Built a multi-threaded HUD in CustomTkinter with universal Windows cursor auto-typing and automated CI verification pipelines.

Meridian Living — Luxury E-Commerce Platform [\[GitHub Repo\]](#) | [Next.js 16](#), [TypeScript](#), [Drizzle ORM](#), [PostgreSQL](#), [Three.js](#), [Tailwind CSS](#)

- Developed a full-stack luxury e-commerce platform featuring 90+ curated products, 3D WebGL room visualizers, and interactive bundle configurators.
- Implemented type-safe relational database queries with Drizzle ORM on PostgreSQL with automated migration scripts and sub-100ms route transitions.

Book Matrix — AI-Powered Library Management System [\[GitHub Repo\]](#) | [Python](#), [SQLite](#), [C](#), [JavaScript](#), [HTML5](#), [CSS3](#), [OOP](#), [System Architecture](#)

- Built a full-stack Library Management System in Python, C, and SQLite managing 500+ book inventory records with automated borrowing workflows, fine calculation, and ER schema design.
- Applied OOP principles and structured software architecture with C-language FFI interop for high-throughput calculation routines.

Personal Portfolio & Project Showcase [\[GitHub Repo\]](#) [\[Live Demo\]](#) | [TypeScript](#), [Next.js 15](#), [Three.js](#), [Tailwind CSS](#), [Framer Motion](#), [Netlify](#)

- Designed and deployed a live personal portfolio showcasing 17+ software and AI repositories, built with Next.js 15, Three.js 3D particles, Tailwind CSS, and Framer Motion.
- Achieved sub-2s load time and full mobile responsiveness — deployed on Netlify with automatic CI/CD on every GitHub push.

HONORS & ACHIEVEMENTS

- 2nd Place — Techno Maze Competition:** Outperformed 20+ competing engineering teams by designing and executing an optimal algorithmic maze navigation strategy under strict time constraints.
- 3rd Place — Mini Hackathon (6-hour sprint):** Designed and prototyped a functional AI-driven web application within a 6-hour window using Agile rapid prototyping — demonstrating end-to-end full-stack development under pressure.
- Consistent Academic Performance:** Demonstrated strong results in core CSE subjects including Data Structures & Algorithms, Object-Oriented Programming (Java/C++), and System Design in 2nd-year engineering coursework.
- Active Open-Source Portfolio:** 17 public GitHub repositories (16 functional codebases with 100% passing automated CI/CD pipelines) spanning AI systems, full-stack web platforms, DSA tools, and game engines.
